

Skilled Workforce for Housekeeping in Pharmaceutical Industry Sites

In an industry where the smallest particle can compromise years of research, hygiene must be handled with scientific rigor. Urja offers specialized [Housekeeping in Pharmaceutical Industry](#) services that focus on high-precision decontamination and sterile maintenance. We solve the persistent challenges faced by organizations, including the risk of cross-contamination and the complexity of regulatory audits, by providing a workforce trained in CGMP and cleanroom protocols. Our technology-driven approach includes digitized logs and validated cleaning cycles to support your compliance needs. Urja delivers consistent quality, ensuring that your laboratories and production zones remain safe, sterile, and perfectly aligned with international pharmaceutical safety standards.
