

Wireless CCTV Camera Systems and Other Outdoor Security Cameras

Having CCTV cameras installed inside and outside the premises is a hassle-free way of taking charge of the situation. [Security Cameras](#) installed on the premises are not just a luxury anymore, in the face of rising crime rates. However, there is a huge amount of gap that needs to be covered in order to have the right CCTV cameras installed for indoor and outdoor use. Talking to the experts will give you an in-depth understanding of how various types of CCTV cameras work for every situation. Nevertheless, we have tried to cover the most suitable cameras for outdoor use in this blog which can provide you with a high-level insight.

Difference between Indoor and Outdoor Cameras

While there is definitely some amount of overlap between the indoor and the outdoor CCTV cameras, the latter should be equipped with additional add-ons to be able to withstand the unpredictable outdoor weather conditions. Moreover, the outdoor cameras are more vulnerable to being tampered with. Also, outdoor CCTV cameras should be sensitive to all types of light conditions. Keeping the above factors in mind, let's discuss the various types of CCTV cameras that are ideal for outdoor use.

Types of Outdoor CCTV Cameras:

1. **Night Vision Cameras:** The true night vision is enabled with the technologies like infrared (IR), the technology which is developed by the military that helps in picking up the images in the low lit and no light areas true to its functionality. The infrared

cameras integrated with the HD cameras give the leeway to capture the license plates and faces with good quality in spite of the low light.

2. **Weather-proof outdoor cameras:** With the harsh outdoor weather like high temperature, heavy rainfalls and the hurricane winds the cameras face a great wear and tear thereby reducing the lifetime of the CCTV cameras. However, the CCTV cameras sealed with the silicone skin protects the cameras from the outdoor wear and tear allowing them to perform its job.
3. **PTZ Cameras:** The PTZ cameras with the pan, tilt, and zoom functionalities are multi-faceted cameras which can be remotely operated with zoom option, which allows the viewer to zoom in into the location under surveillance, tilt the cameras from the remote location to offer a better view. These features basically help in a fewer number of PTZ cameras installation thereby reducing the cost and the effort.
4. **Outdoor wireless security camera systems:** The amazing benefit of the wireless security camera systems is that there are no visible cords that the intruders can tamper with. They basically run on solar-powered batteries or the electric power. However, the battery operated wireless CCTV cameras do need the batteries to be replaced at regular intervals.

The above four outdoor [wireless security cameras in Dubai](#) are widely used based on the situation and the requirement. Installing the right outdoor security cameras can help in securing the premises most effectively.
