

A Complete Guide to SIRA-Compliant CCTV Installation for Dubai Businesses

adequate video coverage, maintain recording quality, support incident investigations and improve workplace safety. Non-compliant CCTV systems may be rejected during inspections or legal investigations. This is why many businesses choose a SIRA-approved provider to ensure full compliance and a smooth approval process.

Businesses That Need SIRA-Compliant CCTV

Many commercial sectors in Dubai are required to follow SIRA regulations, including:

- Offices
- Restaurants and cafés
- Hotels
- Residential buildings

Key SIRA CCTV Requirements in 2026

- **Approved CCTV Equipment** – Businesses must use SIRA-certified cameras, NVRs, DVRs and storage systems. Using low-quality or unauthorized equipment leads to compliance rejection.
- **Proper Camera Placement** – SIRA regulations require cameras to cover entrances and exits, cash counters, parking areas, reception areas and storage zones. Blind spots result in non-compliance.
- **Minimum Video Retention** – Businesses must store surveillance recordings for 30 to 90 days, depending on industry requirements. This ensures footage remains available during investigations.

- **High Recording Quality** – SIRA-approved systems must maintain clear recording quality with at least Full HD 1080p resolution for identification purposes.
- **Secure System Configuration** – CCTV systems must be protected against unauthorized access, hacking attempts and data theft. Professional installers help ensure secure system deployment.

The SIRA Approval Process

The approval process involves several steps :

- Hire a SIRA-approved CCTV installation company
- Professional installation using approved equipment
- Final SIRA inspection and audit

Common Mistakes Businesses Make

Many organizations unknowingly violate SIRA requirements due to incorrect camera placement, low-quality equipment, insufficient storage capacity, incomplete coverage, unapproved installation providers, or poor network security. These mistakes often lead to delays during inspections.
